

THE FABRICATOR

Features 2018

The Fabricator magazine reports on all aspects of manufacture in the fenestration industry both domestic and commercial.

On a monthly basis it reports on new products, processes, services and the materials used:

- **PVC-U**
- **Aluminium**
- **Glass**
- **Consumables**
- **Machinery for fabricators**
- **Machinery for glass processors and IGU manufacturers**

In addition to special features, regular sections in the magazine report on structural glazing and glass processing; an area in which, historically, *The Fabricator* has specialist knowledge.

The editor welcomes articles submitted for publication either for specific features or of general interest.

Call: 07967 666794 or email john.roper@profinder.eu to discuss submissions.
